### Dear Community Members,

The completion of the second Healthy Teton County (HTC) Community Health Needs Assessment (CHNA) marked a momentous step forward toward improving the health and quality of life for Teton County residents.

The CHNA report, released in July 2018, provided our community with a comprehensive overview of the primary health needs we face today. The CHNA findings indicated that while Teton County is very healthy in certain categories, there is still work to be done in other areas. The full HTC report can be found at www.healthytetoncounty.org.

The CHNA identifies a host of critical, community-wide health issues that impact our local health. The following document, the Community Health Improvement Plan (CHIP), includes the strategic framework that will guide the ongoing interventions among our local government agencies, service delivery providers and advocacy groups.

This year, we embarked on a new process for developing the CHIP action plans. Recognizing the impressive efforts already underway to address our local health needs, we convened respective groups of service providers and advocates who work in the same priority area to update the HTC Core Committee on their current and future initiatives to address health disparities. These meetings were facilitated, enabling the groups to synthesize their current action plans.

As was the case in 2015, the goal remains to follow a collective impact model, which allows health issues to be addressed by diverse sectors working towards the shared HTC vision of "a vibrant Greater Teton community where opportunities for excellent health are available to all."

The involvement of multiple stakeholders in each action plan also allows interventions to be implemented at different levels of influence: personal, interpersonal, organizational, the social environment, and the physical environment. With this approach, HTC and the community of Teton County, Wyoming, will continue to work together to focus on what's important, choose effective policies and programs, and implement evaluation strategies. Similarly, we hope that by addressing health issues from a multifactorial perspective, we will see improved health outcomes that are sustained over time.

The HTC Core Committee thanks all of our community partners for your continued dedication to this initiative and the improvement of health and quality of life in Teton County. We could not do it without you.

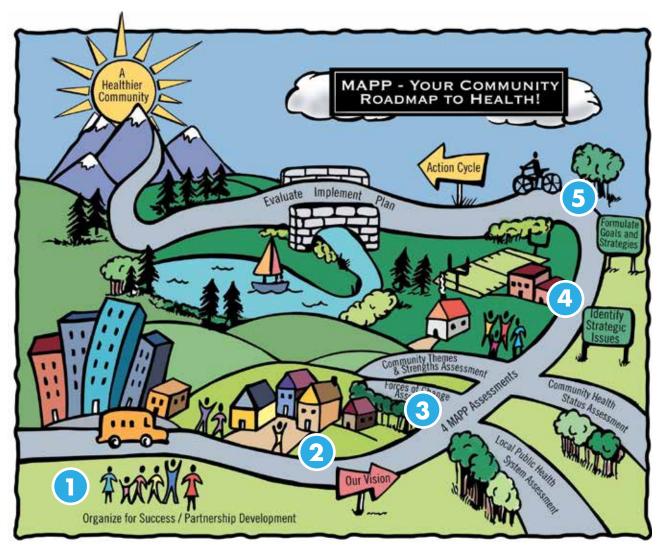

#### Sincerely,

Jodie Pond, MPH, MCHES, Director, Teton County Health Department Julia Heemstra, Director, Wellness, St. John's Medical Center

#### Background

In May 2018, the Healthy Teton County (HTC) coalition completed its second comprehensive community health improvement plan (CHIP) on the health status of Teton County, Wyoming. This project — led by Teton County Health Department (TCHD) and St. John's Medical Center (SJMC), in partnership with over 35 community organizations — identified and prioritized the primary health issues facing Teton County.

After examining both qualitative and quantitative data, the list of key health issues included both traditional clinical indicators as well as social determinants of health. The full CHNA report, including methodology and results, can be found at www.healthytetoncounty.org.

#### Strategic Planning Framework

#### Phases 1–3

The 2018 CHNA again used the strategic framework Mobilizing for Action through Planning and Partnerships (MAPP). Some of the work completed for the 2015 CHNA still held true for the 2018 iteration of the CHNA, so all six phases of the MAPP framework, as seen in Figure 1, were not repeated. The HTC Core Committee voted to use the same methods for Phase 1, Organizing for Success, and for Phase 2, Visioning. The HTC vision of "a vibrant Greater Teton area where opportunities for health are available to all" has continued to guide this project. The Core Committee decided to continue to use this vision statement again for the 2018 CHNA. Phase 3 is comprised of the four MAPP Assessments (Community Health Status Assessment, Community Themes and Strengths Assessment, Forces of Change Assessment, and the Local Public Health System Assessment). In 2018, the Local Public Health System Assessment was not conducted, as there are no significant systems changes since 2015. More detail on the initial phases of the HTC project can be found in the 2018 CHNA document.

#### Phases 4–6

This document contains HTC's Community Health Improvement Plan (CHIP) and provides a summary of HTC's work following Phases 4-6 of the MAPP framework.

- Phases 4-6 included:
- Phase **4**: Identification of Strategic Issues;
- Phase **5**: Formulating Goals and Strategies; and
- Phase **6**: The Action Cycle (Planning, Implementation, and Evaluation).

These phases allow HTC to strategically plan for action around the most important health issues identified in Phases 1-3, ultimately bringing the community together to galvanize around the implementation of evidence-based solutions using a collective impact model.

### Methodology

The primary health needs in Teton County were prioritized by the HTC Steering Committee, a diverse advisory committee made up of over 18 community stakeholders. Findings from the three assessments in Phase 3 were presented to the Steering Committee at a meeting in November 2017. The presentation included information on whether quantitative indicators were statistically significant, whether specific health issues had been identified in the community quality of life survey, and whether the Teton County data met Healthy People 2020 (HP2020) goals. HP2020 is a national framework for health improvement that sets quantitative targets for community health indicators.

Following the data presentation, attendees prioritized the primary health

issues with a weighted voting system. Attendees were prompted to consider three primary criteria: what value the issue has to the community, whether there are proven solutions available for implementation, and if there is a consequence of inaction. Other important criteria that were assessed during the data analysis phase included: number of people affected, seriousness of the health issue, whether there was an observed data trend, and if certain groups were disproportionately affected. In addition, the feasibility of interventions was considered. All criteria utilized during the data analysis and issue prioritization phases were adopted from a list provided by MAPP.

### Primary Health Issues

The prioritized health issues for Teton County, which include health behaviors and conditions and the social determinants of health, are on page 7. This year, the social determinants of health were prioritized separately from the health behaviors and conditions because they require different strategies and a multisectoral approach. The priorities from the 2015 CHNA continue to be monitored and addressed, even though some do not meet the criteria to be included for prioritization in the 2018 CHNA. Emerging issues within the community are being pro-actively addressed by local providers. At this time, the emerging issues did not meet the criteria to be included in the prioritization process for the 2018 CHNA, but HTC will continue to monitor these issues in future iterations of the CHNA. Positive indicators are areas where Teton County performs better than either the state of Wyoming or the United States.

# HTC PREVENTION STRATEGY

To address the top nine health issues in a strategic and organized manner, HTC turned to the National Prevention Strategy (NPS). The NPS, created by the Office of the Surgeon General of

the L Arevening Drug Autre and Excessive Alcohol Use the United States, "envisions a prevention-oriented society where all sectors recognize the value of health for individuals, families, and society and work together to achieve better health for Americans." Figure 2 is a visual representation of the NPS incorporating the goal, strategic directions and priorities. This framework provides evidence-based solutions to common health problems and was developed "to guide the United States in the most effective and achievable means for improving health and well-being."

The HTC Prevention Strategy (Figure 3), a modification of the NPS, is centered around the HTC vision of "a vibrant Greater Teton community where opportunities for excellent health are available to all." This customized prevention strategy contains three strategic directions: healthy and safe community environments, clinical and community preventive services, and access to health services. It is based on four pillars: health equity, elimination of health disparities, empowered people, and the social determinants of health (shown in the four corners of Figure 3).

8 Healthy Teton County | 2019 Community Health Improvement Plan | HealthyTetonCounty.org

## Health Equity

Health equity is defined by the Center for Disease Control (CDC) as the, "attainment of the highest level of health for all people." The CDC goes on to say that when health equity exists, no one is "disadvantaged from achieving their highest potential because of social position or other socially determined circumstances." Health inequities are reflected through differences in length of life; quality of life; rates of disease, disability, and death; severity of disease; and access to treatment. Health equity is achieved when health disparities, described below, are eliminated.

# Elimination of Health Disparities

The NPS describes health disparities as, "differences in health outcomes across subgroups of the population, often linked to social, economic, or environmental disadvantages (e.g., less access to good jobs, unsafe neighborhoods, and lack of affordable transportation options). Health disparities adversely affect groups of people who have sys-

# **Empowered People**

HTC also recognizes that individuals must be supported in taking an active role to improve their health. The NPS states that, "people become empowered when they have the knowledge, ability, resources, and motivation to identify and tematically experienced greater obstacles to health on the basis of their racial or ethnic groups, religion, socioeconomic status, gender, age, mental health, cognitive, sensory or physical disability; sexual orientation or gender identity; geographic location; or other characteristics historically linked to discrimination or exclusion."

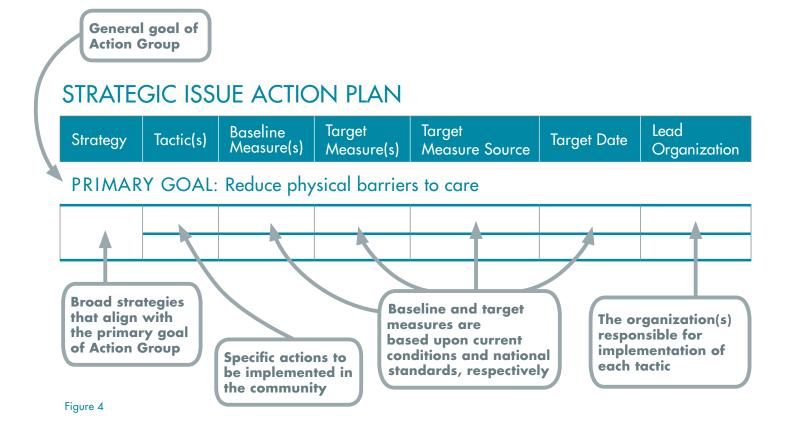

make healthy choices. When people are empowered, they are better able to improve their health, support their families and friends in making healthy choices, and lead community change."

### Social Determinants of Health

HTC aims to create social and physical environments that create good health for all. Understanding the relationship between how population groups experience "place" and the impact of "place" on health is fundamental to the social determinants of health — including both social and physical influences. The term Social Determinants of Health (SDOH) is defined by the World Health Organization as, "the conditions in which people are born, grow, live, work and age." SDOH include factors such as the built environment, access to health services, social connections, education, housing, and economic stability.

## THE ACTION PLAN

Following the identification of the 2018 HTC priority areas, service providers and advocates addressing each priority area met to discuss their current and future service goals. Through these meetings, each group was tasked with completing an action plan related to their respective issue of focus. Each action plan includes a broad primary goal, general strategies, and specific tactics for each strategy. Action plans also list target measures and indicate which organizations or individuals will be participating in each tactic. The basic action plan framework is shown below in Figure 4, with each component labeled for reference. This model will be followed for each of the top 9 issues on the following pages.

### Action Plan Components

All HTC action plans were guided by three primary community development principles: evidence-based best practices, standardized national target measures, and Collective Impact. These guiding principles utilize proven health improvement strategies and are explained in detail below.

#### 1) Evidence-based Best Practices

The action plans that follow include interventions identified by local experts as those proven to be effective in similar community settings and also effective for our community's make-up and resources. Some interventions are being carried forward from the 2015 CHIP process, and some are being launched. Many of the interventions are grounded in peer-reviewed research that was identified in the 2015 MAPP process. The primary resources used during the 2015 selection of these services included: County Health Rankings and Roadmaps, The Community Guide, and the Center for Disease Control's Community Health Improvement Navigator.

#### 2) National Target Measures

Data from the HTC Community Health Improvement Plan report were analyzed against state and national data sets as often as possible. This data analysis strategy provided a broad context for Teton County's health indicators and allowed local results to be compared to similar data across the nation. Similarly, the HTC Action Groups are working toward the Healthy People 2020 (HP2020) target measures if available. HP2020 is a federal program focused on, "providing science-based, 10-year national objectives for improving the health of all Americans." The HP2020 target measures are the end goal for each action plan. These target measures may take multiple iterations of the CHNA to achieve. Due to this, the 2018 action plan target measures focus on smaller goals that will move Teton County closer to the HP2020 target measures.

#### 3) Collective Impact

The Collective Impact (CI) framework provides guidelines for organizations or individuals who are working together towards a common goal. CI was first introduced in an article of the Stanford Social Innovation Review by researchers who observed, "that large-scale social change comes from better cross-sector coordination rather than from the isolated intervention of individual organizations." This community development model emphasizes: setting a common agenda, using common performance measures, implementing mutually-reinforcing activities, focusing on clear communications, and utilizing a backbone organization.

# Mental Health Action Plan

Mental health is a state of successful performance of mental function, resulting in productive activities, fulfilling relationships with other people, and the ability to adapt to change and to cope with challenges. Mental health is essential to personal well-being, family and interpersonal relationships, and the ability to contribute to community or society.

| Strategy  | Tactic(s)   | Baseline Measure(s)  |
|---|---|--|
| PRIMARY GOAL: Reduce                                      | cost as a barrier to mental   | health care  |
| Offset costs of mental health<br>care services.           | Maintain a dedicated mental<br>health care fund at the St.<br>John's Hospital Foundation<br>to provide funding for mental<br>health appointments.       | \$2,900 in funds were disbursed.   |
|   | Provide scholarships and fee<br>adjustments for all JHCCC<br>services (case management,<br>peer specialists, medication<br>management, job counseling). | 1068 clients served. 923 clients<br>received additional fee adjustment.<br>860 clients qualified for the sliding fee<br>scale. |
|   | Maintain Medication Case<br>Manager to assist clients<br>with applying for financial<br>assistance for medication.                                      | 1 Full-time equivalent (FTE)   |
| Provide low-cost options for mental health care services. | Provide services on a sliding scale, based on ability to pay.   | 1068 clients served. 99.8% patients pay less than full cost of service.  |

| Strategy   | Tactic(s)                                  | Baseline Measure(s) |  |  |
|--|--|---------------------|--|--|
| PRIMARY GOAL: Reduce physical barriers to care                         |  |                     |  |  |
| Provide telephone-based referrals to<br>local mental health resources. | Maintain SJMC Mental Health Resource Line. | 40 callers served.  |  |  |

| Address mental health concerns<br>during primary care visits. | Employ a mental health professional in the SJMC outpatient clinics to reduce barriers and increase access to mental health care. | 1 FTE |
|---|--|-------|
|   |  |       |

- » Reduce cost as a barrier to mental health care.
- » Reduce physical barriers to mental health care.
- » Ensure availability of services in crisis situations
- » Ensure community education, awareness, prevention and stigma reduction services.

# Alcohol Action Plan

Tactic(s)

Strategy

According to Healthy People 2020, substance abuse, including alcohol, "has a major impact on individuals, families, and communities. The effects of substance abuse are cumulative, significantly contributing to costly social, physical, mental, and public health problems. These problems include: teenage pregnancy, or Human Immunodeficiency Virus/Acquired Immunodeficiency Syndrome (HIV/AIDS) and other Sexually Transmitted Diseases (STDs), domestic violence, child abuse, motor vehicle crashes, physical fights, crime, homicide, and suicide."

Baseline Measure(s)

| 50 20 297  |   |  |  |  |  |
|--|---|--|--|--|--|
| PRIMARY GOAL: Reduce alcohol and other substance use among teens                               |   |  |  |  |  |
| Educate youth and parents<br>about the risks associated with<br>the substances they are using. | Continue Teton County<br>School District (TCSD) Parent<br>Connections Nights.   | 65 parent attendees per event and 3 events per year  |  |  |  |
|  | Continue substance use<br>prevention curriculum in all<br>Teton County Schools.   | Educated 1,200 students in 2017.   |  |  |  |
|  | Provide education/seminars<br>about risks associated with<br>substances.  | 3 educational seminars per year, or as issues arise  |  |  |  |
| Decrease youth accessibility to alcohol.   | Decrease selling to minors in<br>liquor stores and serving in<br>restaurants.   | In 2017, there were 61 alcohol<br>compliance checks completed<br>in the Town of Jackson. 84% of<br>establishments passed, while 16%<br>failed. |  |  |  |
|  | Educate parents about the<br>prevalence of youth accessing<br>alcohol at home with or<br>without parents' knowledge,<br>also known as "social hosting,"<br>during parent connection<br>nights/events. | 65 parent attendees per event and 3 events per year  |  |  |  |
|  | Increase awareness of TIPS<br>training among restaurant and<br>bar owners and managers.<br>Encourage alcohol vendors to<br>support TIPS training.   | 185 TIPS-trained employees in 2017.<br>5 trained instructors in 2018.  |  |  |  |

- » Reduce alcohol and other substance use among teens.
- » Change social norms around alcohol and other substance use.
- » Increase access to prevention & addiction care services.

## Sexual/Reproductive Health Action Plan

According to Healthy People 2020, "Reproductive and sexual health is a key component to the overall health and quality of life for both men and women. Improving reproductive and sexual health is crucial to eliminating health disparities, reducing rates of infectious diseases and infertility, increasing educational attainment, career opportunities, and financial stability."

| Strategy                                     | Tactic(s)   | Baseline Measure(s)   |  |  |  |
|--|---|---|--|--|--|
| PRIMARY GOAL: Decr                           | PRIMARY GOAL: Decrease STI transmission among ages 12-24  |   |  |  |  |
| Increase STI screening                       | All adult and teen family planning<br>clients at Teton County Health<br>Department (TCHD) complete sexual<br>risk assessment form and are offered<br>screening at low to no cost. When<br>appropriate, refer to a provider. | New initiative, so no baseline<br>established.  |  |  |  |
|  | Create a teen/young adult friendly<br>environmentat TCHD. Youth focus<br>groups will be used to obtain<br>information on how best to access<br>and serve that population.   | Youth focus groups scheduled for<br>August 2015.  |  |  |  |
|  | Review teen-friendly clinic checklist.  |   |  |  |  |
|  | Increase availability for screening<br>at TCHD by extending hours to<br>accommodate urgent walk-ins and<br>youth.   | 8 hours of clinic time  |  |  |  |
|  | Continue to provide low to<br>no-cost testing through<br>Knowyo.org voucher<br>program and other funds.   | All clients requesting STD screening<br>have access to low to no-cost<br>screening at TCHD. |  |  |  |
| Make additional clinic<br>services available | Mid-level provider care available<br>at TCHD at low to no-cost for<br>reproductive and sexual health care<br>services.  | 1 Family Nurse Practioner for 8<br>hours once a week, and 1 FNP for 4<br>hours once a week. |  |  |  |

- » Increase STI screening.
- » Increase community awareness of available STI prevention services.
- » Make additional clinic services available.
- » Maintain STI prevention activities.

# Chronic Disease Prevention Action Plan

Routine preventive screenings such as mammograms, colorectal screenings, and diabetic screenings have the potential to catch the development of disease before it progresses.

| Strategy   | Tactic(s)   | Baseline Measure(s)  |  |  |
|--|---|--|--|--|
| PRIMARY GOAL:  | PRIMARY GOAL: Increase rates of mammography, colonoscopy and diabetic screening   |  |  |  |
| Increase rates of<br>routine colorectal<br>screenings  | Increase community awareness efforts<br>about colorectal screening and enhanced<br>online scheduling.   | 573 colorectal screenings performed<br>at SJMC on Teton County residents<br>during FY 18. Note: colorectal<br>screenings are only recommended<br>once per a decade for asymptomatic<br>patients. |  |  |
| Increase rates of<br>routine mammography<br>screenings   | Increase capacity to schedule and<br>perform mammograms through purchase<br>of a breast tomosynthesis mammography<br>machine to be located at SJMC.   | In FY 2018, 2,061 mammograms<br>were performed at SJMC for Teton<br>County residents   |  |  |
|  | Provide financial assistance specifically for mammography screenings.   | \$11,330 of financial assistance<br>was provided in 2018, covering 45<br>screenings.   |  |  |
| Increase rates of<br>routine diabetic<br>screenings.   | Provide evidence-based free screenings,<br>including A1C, at annual Health Fair.<br>Provide low-cost or no-cost A1c screening<br>to community members on a walk-in<br>basis and at other outreach events. Refer<br>those at risk for diabetes to the Diabetes<br>Self-Management Program for further<br>consultation. | 45 screenings were financially<br>assisted in 2018. 28 walk-in<br>screenings were conducted during<br>diabetes awareness month.  |  |  |
| Empower individuals<br>with and without<br>chronic disease to<br>play a more active<br>role in their health and<br>disease management. | Provide ongoing education and training<br>through Stanford University's Healthy U<br>curriculum and locally developed Whole<br>Health program.  | Four iterations of Healthy U and two<br>iterations of Whole Health have been<br>completed in the community.  |  |  |

» Increase screening rates via education, increased services, and financial assistance

| Target Measure(s)   | Target Measure Source     | Target Date | Lead Organization                   |

| Increase the number of<br>screenings provided in 2019<br>by 1%. | St. John's Medical Center | Ongoing     | St. John's Medical Center           |
| Continue providing these<br>programs as needed.                 | St. John's Medical Center | Ongoing     | St. John's Medical Center           |

### Nicotine Action Plan

The use of any kind of tobacco is associated with cancer, diseases of the mouth, increased risk of heart attack and stroke and may cause nicotine addiction. Nicotine exposure during periods of significant brain development, such as adolescence, can disrupt the growth of brain circuits that control attention, learning, and susceptibility to addiction. The effects of nicotine exposure during youth and young adulthood can be long-lasting, including lowering impulse control and increasing mood disorders. The nicotine in e-cigarettes and other tobacco products can prime young brains for addiction to other drugs, such as cocaine and methamphetamine.

| Strategy  | Tactic(s)   | Baseline Measure(s)   |  |  |
|---|---|---|--|--|
| PRIMARY GOAL: Primary   | PRIMARY GOAL: Primary Goal: Reduce and prevent nicotine use   |   |  |  |
| Provide resources to the<br>community to prevent uptake<br>and reduce all types of nicotine       | Distribute cessation quit kits<br>and educational brochures.  | In 2018, 400 quit kits were distributed to 4 medical facilities.  |  |  |
| USE   | Mayo Clinic certified tobacco<br>cessation specialist on SJMC<br>Wellness staff provides free<br>nicotine quit services.  | 1 FTE   |  |  |
| Reduce and prevent use of<br>nicotine vaping among middle<br>school and high school age<br>youth. | Use social media, newspaper,<br>and theater advertising to<br>raise awareness and educate<br>the public about the recent<br>significant prevalence of youth<br>nicotine vaping in Teton County<br>and its associated risks. | CPCTC Facebook page had 47 likes<br>in December of 2017.<br>No video or newspaper<br>advertisements at this time. |  |  |
|   | Expand substance use<br>prevention curriculum in<br>all Teton County Schools to<br>include all forms of nicotine<br>use.  | Educated 1,200 students this year.  |  |  |

- » Provide resources to the community to prevent uptake and reduce all types of nicotine use.
- » Reduce and prevent use of nicotine vaping among middle school and high school age youth.

### Immunizations 65+ Action Plan

Immunizations for individuals over the age of 65 can reduce the spread of communicable diseases. Seniors, youth, and those with compromised immune systems are all populations who are vulnerable to common illnesses such as influenza and pneumonia.

| Strategy  | Tactic(s)  | Baseline Measure(s)  |  |
|---|--|--|--|
| PRIMARY GOAL: Increase immunizations for community members aged 65+                             |  |  |  |
| Increase number of<br>seniors seeking flu and<br>pneumococcal vaccinations.                     | Place Senior-friendly newspaper ads<br>in the Daily and Weekly newspapers<br>advertising for 'flu season'; advertise<br>Senior flu shot clinics in Senior Center<br>newsletter     | 1 ad during or before each flu<br>season showing an active and/<br>or healthy senior with reference<br>to clinics and need for flu and<br>pneumonia vaccines |  |
|   | Distribute paper flyers around Teton<br>County in centers/buildings frequently<br>visited by the 65+ population.   | Article in Senior Center newsletter.<br>Flyers posted in Senior Center,<br>Recreation Center, library and<br>other sites.                                    |  |
| Increase communication<br>with clients about vaccine<br>availability and routine<br>follow-ups. | Share information from vaccine<br>distributors regarding immunization<br>brands available as supplies change<br>throughout the season  | Calls to other providers made at<br>least once during the flu season.  |  |
|   | Increase entities that use the WyIR<br>(Wyoming Immunization Registry)<br>since legislation passed in February<br>2018 mandating that all vaccine<br>providers must enter in WyIR. | TCHD and pharmacies are<br>entering into the WyIR.   |  |
| Improve education<br>surrounding flu and<br>pneumococcal vaccinations.                          | Provide educational material at TCHD walk-in and offsite mass clinics.   | Distribute flu and pneumonia<br>vaccine brochures to 100 clients<br>per year.  |  |
| Increase volume of flu and pneumococcal vaccination.  | Provide offsite mass vaccination clinics   | 2-3 Senior Center Clinics and<br>1 other clinic targeting Seniors<br>(possibly at Assisted Living Center)<br>will be held by TCHD each year.                 |  |
|   | Maintain stock of Pneumonia 23 VUA<br>(vaccine for uninsured adults), which is<br>state supplied. Maintain private stock<br>of Pneumonia 23 and Prevnar.                           | Keep VUA Pneumonia 23 and<br>private stock of Prevnar and<br>Pneumonia 23 vaccine in stock at<br>TCHD all times.   |  |
|   | Recall clients who are due for a second<br>pneumonia vaccine (Pneumonia 23<br>and Prevnar).  | Recall system designed and<br>implemented for Pneumonia<br>vaccines by January 2019.   |  |

- » Increase number of seniors seeking and receiving flu and pneumococcal vaccinations.
- » Increase communication with/education of clients about vaccine availability and routine follow-ups.

### Severe Housing Action Plan

Severe housing is defined by County Health Rankings as "A household that has one or more of the following: Housing unit lacks complete kitchen facilities; lacks complete plumbing; severely overcrowded (1.5 persons or more per room); severely cost burdened (monthly costs including utilities exceed 50% of monthly income)." According to the Robert Wood Johnson Foundation, physical conditions of the home, neighborhood conditions, and housing affordability have the potential to affect health both directly and indirectly. Good health depends on having homes that are affordable, safe and free from physical hazards.

This social determinant of health has fewer strategies than the others, not because this issue is less important, but because the Jackson/Teton Workforce Housing Action Plan, which has already been developed, is so thorough. The severe housing issue is complex in nature and demands a community-wide approach to truly solve the problem. The Workforce Housing Action Plan involved community members and stakeholders to identify the initiatives used to work on severe housing.

| Strategy   | Tactic(s)  | Baseline Measure(s)                  |  |  |
|--|--|--------------------------------------|--|--|
| PRIMARY GOAL: Increase capacity for Teton County workforce to live locally   |  |                                      |  |  |
| Create, manage, and promote<br>cross-sector collaboration of<br>joint Town of Jackson/Teton<br>County initiatives and agencies<br>to address local housing issues. | Implement the Jackson/Teton<br>County Housing Action Plan.<br>http://www.tetonwyo.org/<br>DocumentCenter/View/1835/<br>Workforce-Housing-Action-Plan-<br>November-2015-PDF | 59% of local workforce live locally. |  |  |
| Provide housing for homeless<br>individuals in Teton County.   | Provide free/low-cost nightly<br>shelter for Teton County<br>residents and transient<br>individuals.   | 9,164 nightly bed stays per year.    |  |  |

- » Create, manage, and promote cross-sector collaboration of joint Town of Jackson/ Teton County initiatives and agencies to address local housing issues.
- » Provide housing for homeless individuals in Teton County.

| Target Measure(s)                          | Target Measure Source  | Target Date | Lead Organization  |

| Minimum 65% of workforce<br>lives locally. | Town and County Annual<br>Indicator Report (produced<br>by joint long-range<br>planning department). | 2022        | Jackson/Teton County<br>Affordable Housing<br>Department |
| 10,700 nightly bed stays per<br>year.      | Good Samaritan Mission   | 2021        | Good Samaritan Mission                                   |

### Access to Care Action Plan

Access to Health Services encompasses four components: 1) insurance coverage; 2) cost as a barrier to care; 3) information as a barrier to care; and 4) language as a barrier to care. Individuals or families without adequate insurance coverage may delay or completely forgo preventive care, leading to more complex health needs and therefore higher health care costs down the road. Similarly, if cost, information or language are barriers to receiving care, both the insured and uninsured may not visit providers as often as they should for optimal health. The Access to Care Action Plan addresses each of these issues.

| Strategy   | Tactic(s)   | Baseline Measure(s)   |  |  |
|--|---|---|--|--|
| PRIMARY GOAL: Increase   | PRIMARY GOAL: Increase insurance coverage of the uninsured  |   |  |  |
| Coordinate health insurance<br>enrollment for those without<br>insurance | Ensure widespread, community<br>awareness of 6-week<br>marketplace plan enrollment<br>period.                     | # people enrolled in Affordable Care<br>Act (ACA) plans in Teton County:<br>2014: 1574<br>2015: 2615<br>2016: 2812<br>2017: 2825<br>2018: 2782  |  |  |
|  | Increase # of ACA navigators<br>available to assist with<br>enrollment procedures and<br>re-enrollment processes. | Four total ACA navigators   |  |  |
|  | Enroll clients eligible for<br>Medicare/Medicaid/KidCare<br>CHIP or refer to appropriate<br>resources.            | <ul> <li>255 families were assisted with<br/>Medicaid/KidCare CHIP enrollment<br/>through One22 in 2017.</li> <li>187 families were assisted with<br/>Medicaid/KidCare CHIP enrollments<br/>through TCHD in FY18.</li> <li>43 clients assisted with Medicare sign<br/>ups through WYSHIIP.</li> </ul> |  |  |

- » Coordinate health insurance enrollment for those without insurance.
- » Eliminate cost as a barrier to health care services. Provide financial assistance and related counseling on how to manage hardship associated with major medical bills.
- » Maintain and expand wellness programs throughout the community.
- » Provide interpretation services at medical appointments throughout the community.

| Target Measure(s)  | Target Measure Source   | Target Date | Lead Organization   |
|--|---|-------------|---|
|  |   |             |   |
| Expand the number of ACA<br>navigators, including working<br>with large employers to train<br>navigators in their agencies.                            | St. John's<br>Medical Center  | Ongoing     | St. John's<br>Medical Center  |
| Maintain current enrollment<br>trend for ACA plans.  | St. John's<br>Medical Center  | Ongoing     | St. John's<br>Medical Center  |
| Enrollment level to remain<br>steady in the coming years,<br>unless there are changes in<br>KidCare CHIP or Medicaid at<br>the federal or state level. | One22, Teton County<br>Health Department,<br>Wyoming State Health<br>Insurance Information<br>Program (WYSHIIP) | Ongoing     | One22, Teton County<br>Health Department,<br>Wyoming State Health<br>Insurance Information<br>Program (WYSHIIP) |

| Strategy  | Tactic(s)  | Baseline Measure(s)   |  |
|---|--|---|--|
| PRIMARY GOAL: Eliminate cost as a barrier to health care services   |  |   |  |
| Provide financial assistance to<br>patients who meet criteria to<br>assist with payment of medical<br>bills. Provide medications and<br>services to individuals who<br>otherwise have no/little access<br>to health care.   | Raise and distribute funds<br>for patients in need of care.<br>Patients who meet eligibility<br>guidelines can qualify for<br>patient assistance for all SJMC<br>services and at all SJMC<br>clinics.  | In fiscal year 2017, St. John's Medical<br>Center patient assistance funds totaled<br>\$3,900,528, which served 1,553<br>SJMC patients. In addition, patients<br>accessed \$204,346 from St. John's<br>Hospital Foundation Patient Assistance<br>funds. |  |
| Provide financial assistance<br>and/or counseling on how to<br>manage hardship associated<br>with major medical bills (rent,<br>transportation, medication).  | Provide one-time financial<br>assistance for major, non-<br>medical expenses that limit<br>ability to pay for health<br>care services (e.g. rent,<br>transportation).  | 548 financial assistance clients served<br>in 2017. \$156,021.73 in financial<br>assistance awards provided through<br>One22's Emergency Assistance Fund,<br>Salvation Army, and Community<br>Service Block Grant.                                      |  |
| Teton County Health Department<br>provides many health care<br>services at free or reduced costs<br>based on a client's income and<br>family size. Teton County Health<br>Department services include:<br>family planning, immunizations,<br>prenatal care, HIV and TB case<br>management, STD testing. | TCHD to provide financial<br>assistance for services based<br>on a client's income and<br>family size.   | Current service level   |  |
| Maintain low-cost services at<br>Teton Free Clinic.   | Teton Free Clinic is a grant-<br>funded clinic that serves<br>individuals that do not have<br>any health insurance and meet<br>their guidelines for service. To<br>be served, clients must have a<br>photo ID of some kind, proof<br>of employment or residence in<br>Teton County and make under<br>200% of the federal poverty<br>level. Clients are also asked to<br>make a \$5 donation. | An average of 25 patients/week or<br>~1300 patients per year are served<br>by the Teton Free Clinic. Some<br>individuals are turned away due to<br>capacity.  |  |

# Food Insecurity Action Plan

Food insecurity is defined by Feeding America as, "Lack of access, at times, to enough food for an active, healthy life for all household members, and limited or uncertain availability of nutritionally adequate food." Individuals or families that suffer from food insecurity may experience more stress and more negative health outcomes.

| Strategy | Tactic(s) | Baseline Measure(s) |  |
|----------|-----------|---------------------|--|
|          |           |                     |  |

### PRIMARY GOAL: Reduce number of households considered food insecure

| Increase awareness<br>and participation in                                  | Teton County School District (TCSD) to promote summer lunch programs.   | Served at least 2,000 meals per summer in partnership with 8 summer programs.  |
|---|---|--|
| programming and<br>support for food-<br>insecure children                   | Assist in enrollment for free/reduced<br>lunch program in schools.  | 23% of student population  |
|   | Increase access to food for children<br>through partnering with summer<br>programs.   | Partner with 7 summer programs, reaching<br>165 children.  |
| Provide free food<br>for food-insecure<br>children, seniors<br>and families | Provide funding for meals to children<br>who apply for free/reduced meals<br>and are denied due to established<br>financial requirements. | 100 total students, approximately \$50,000<br>per calendar year  |
|   | Continue dissemination of "Friday<br>backpacks" to food-insecure children.  | 31 backpacks are distributed each week.  |
|   | Provide subsidized meals in all public<br>schools through USDA's National<br>School Lunch Program during the<br>school year.              | 12% of all TCSD students receive free<br>meals and 8% receive reduced price meals.<br>The number of students with negative<br>cafeteria balances has doubled in the past<br>year. TCSD continues to allow children to<br>purchase food even if their accounts have<br>negative balances. |

- » Increase awareness of and participation in programming and support for food-insecure children, families, and seniors.
- » Provide free food for food-insecure children and seniors.

# NEXT STEPS

It will be a progressive process to evaluate the extent to which the HTC Action Plans have improved health behaviors, health conditions, and social determinanats of health. Outcome measures will be reassessed when HTC begins its third iteration of the MAPP process at the end of 2020.
